Jane Doe

Machine Learning Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

Highly motivated Machine Learning Engineer with 3 years of experience in designing, developing, and deploying machine learning and generative AI solutions. Skilled in Python, deep learning, NLP, MLOps, and cloud platforms. Strong software engineering background with a Bachelor's degree in Software Engineering.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – **InnovateAI Solutions** **Jul 2024 – Present**

- Developed and deployed LLM-powered applications for enterprise clients, utilizing Python and cloud infrastructure.
- Built RAG pipelines using vector databases and embedding models, showcasing expertise in generative AI.
- Improved model inference performance by 30% through optimization techniques, demonstrating proficiency in MLOps.
- Collaborated with product and engineering teams to integrate AI services into production systems, highlighting strong communication skills.

Machine Learning Engineer – **DataVision Technologies** **Jul 2023 – Jun 2024**

- Designed predictive analytics models for customer behavior forecasting, leveraging machine learning and Python.
- Implemented end-to-end ML pipelines using cloud infrastructure and automated model monitoring and retraining workflows.
- Reduced model deployment time by 40% through CI/CD improvements, demonstrating ability to work efficiently in R&D; environments.
- Utilized Scikit-learn, TensorFlow, and PyTorch to develop and deploy machine learning models, showcasing technical expertise.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, demonstrating expertise in generative AI and natural language processing.

Customer Churn Prediction Platform

Designed and implemented a customer churn prediction platform, utilizing machine learning and Python to serve business analytics teams.

Automated Document Processing pipeline

Built an automated document processing pipeline using NLP and OCR technologies, showcasing ability to work with varied data sources and formats.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University **Graduated: 2023**
