Jane Doe

Applied AI Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

AI Engineer with 3 years of experience designing, developing, and deploying machine learning and generative AI solutions, leveraging LLMs, RAG, and other machine learning technologies. Strong software engineering background with a Bachelor's degree in Software Engineering.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions — **Jul 2024 – Present**

- Developed and deployed LLM-powered applications for enterprise clients, leveraging machine learning and generative AI technologies.
- Built RAG pipelines using vector databases and embedding models to improve model performance.
- Improved model inference performance by 30% through optimization techniques, ensuring efficient deployment of AI solutions.
- Collaborated with product and engineering teams to integrate AI services into production systems, driving business growth and customer satisfaction.

Machine Learning Engineer – DataVision Technologies — **Jul 2023 – Jun 2024**

- Designed predictive analytics models for customer behavior forecasting, utilizing machine learning and data science techniques.
- Implemented end-to-end ML pipelines using Python and cloud infrastructure, ensuring scalable and efficient deployment of AI solutions.
- Automated model monitoring and retraining workflows, reducing manual effort and improving model performance.
- Reduced model deployment time by 40% through CI/CD improvements, enabling faster time-to-market for AI-powered products.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an AI-powered knowledge assistant using RAG, leveraging LLMs and machine learning technologies to improve information retrieval and user experience.

Customer Churn Prediction Platform

Built a predictive analytics platform using machine learning and data science techniques to forecast customer churn, enabling proactive retention strategies and improved customer satisfaction.

Automated Document Processing pipeline

Designed and implemented an automated document processing pipeline using NLP and OCR technologies, streamlining document processing and improving operational efficiency.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University **Graduated: 2023**
