

Jane Doe

Machine Learning Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

Highly motivated and experienced AI Engineer with a strong background in software engineering, machine learning, and generative AI. Proven experience in designing, developing, and deploying machine learning and generative AI solutions. Skilled in Python, deep learning, NLP, MLOps, and cloud platforms.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, utilizing Python and cloud infrastructure.
- Built RAG pipelines using vector databases and embedding models, improving model inference performance by 30% through optimization techniques.
- Collaborated with product and engineering teams to integrate AI services into production systems, ensuring seamless model deployment and maintenance.
- Improved model performance and reliability, leveraging MLOps best practices and CI/CD pipelines.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, implementing end-to-end ML pipelines using Python and cloud infrastructure.
- Automated model monitoring and retraining workflows, reducing model deployment time by 40% through CI/CD improvements.
- Worked in cross-functional teams alongside product managers, engineers, and analysts, ensuring effective model deployment and maintenance.
- Utilized modern ML tools and platforms, applying best practices in testing, version control, and infrastructure as code.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, leveraging vector databases and embedding models to improve model performance and reliability.

Customer Churn Prediction Platform

Designed a predictive analytics platform for customer churn prediction, utilizing machine learning pipelines and cloud infrastructure to deliver accurate and reliable predictions.

Automated Document Processing pipeline

Built an automated document processing pipeline using NLP and OCR technologies, streamlining document processing and improving overall efficiency.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
