

Jane Doe

Machine Learning Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

Highly skilled Machine Learning Engineer with 3 years of experience in designing, developing, and deploying machine learning and generative AI solutions. Proficient in Python, deep learning, NLP, MLOps, and cloud platforms. Strong software engineering background with a Bachelor's degree in Software Engineering.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, utilizing expertise in machine learning and generative AI.
- Built RAG pipelines using vector databases and embedding models, demonstrating proficiency in designing and implementing production-ready AI systems.
- Improved model inference performance by 30% through optimization techniques, showcasing ability to enhance model efficiency and reliability.
- Collaborated with product and engineering teams to integrate AI services into production systems, highlighting strong teamwork and communication skills.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, utilizing expertise in machine learning and data preprocessing.
- Implemented end-to-end ML pipelines using Python and cloud infrastructure, demonstrating proficiency in developing and deploying machine learning solutions.
- Automated model monitoring and retraining workflows, showcasing ability to streamline model development and deployment processes.
- Reduced model deployment time by 40% through CI/CD improvements, highlighting ability to optimize model deployment and improve efficiency.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, demonstrating expertise in generative AI and natural language processing.

Customer Churn Prediction Platform

Designed a customer churn prediction platform, utilizing machine learning and data preprocessing techniques to develop predictive analytics models.

Automated Document Processing pipeline

Developed an automated document processing pipeline using NLP and OCR technologies, showcasing ability to apply machine learning and AI techniques to real-world business problems.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
