

Jane Doe

Artificial Intelligence Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

AI Engineer with 3 years of experience designing, developing, and deploying machine learning and generative AI solutions. Experienced in Python, deep learning, NLP, MLOps, cloud platforms, and production-grade AI systems.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, utilizing expertise in generative AI and cloud platforms.
- Built RAG pipelines using vector databases and embedding models, improving model inference performance by 30% through optimization techniques.
- Collaborated with product and engineering teams to integrate AI services into production systems, ensuring seamless deployment and operation.
- Improved model inference performance by 30% through optimization techniques, demonstrating expertise in AI solution development and deployment.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, leveraging machine learning expertise and cloud infrastructure.
- Implemented end-to-end ML pipelines using Python and cloud infrastructure, automating model monitoring and retraining workflows.
- Reduced model deployment time by 40% through CI/CD improvements, demonstrating ability to streamline operations and improve efficiencies.
- Automated model monitoring and retraining workflows, ensuring high-quality AI solutions and minimizing manual intervention.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, demonstrating expertise in generative AI and natural language processing.

Customer Churn Prediction Platform

Designed a predictive analytics platform for customer churn prediction, leveraging machine learning and cloud infrastructure to deliver high-value AI use cases.

Automated Document Processing pipeline

Built an automated document processing pipeline using NLP and OCR technologies, improving operational efficiency and business performance through AI-powered automation.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
