

Jane Doe

AI/ML Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

AI Engineer with 3 years of experience designing, developing, and deploying machine learning and generative AI solutions, leveraging expertise in Python, deep learning, NLP, MLOps, and cloud platforms to drive production-grade AI systems.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, leveraging expertise in Python and cloud platforms.
- Built RAG pipelines using vector databases and embedding models, optimizing model inference performance by 30%.
- Collaborated with product and engineering teams to integrate AI services into production systems, ensuring seamless model consumption.
- Improved model performance through optimization techniques, driving production-grade AI systems.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, implementing end-to-end ML pipelines using Python and cloud infrastructure.
- Automated model monitoring and retraining workflows, reducing model deployment time by 40% through CI/CD improvements.
- Implemented inference systems for content optimization, fine-tuning and deploying multimodal AI systems using MLOps best practices.
- Collaborated with data science teams to transition research models into production-ready systems, driving business outcomes and user experiences.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, leveraging vector databases and embedding models to drive production-grade AI systems.

Customer Churn Prediction Platform

Designed a predictive analytics platform for customer behavior forecasting, implementing end-to-end ML pipelines using Python and cloud infrastructure.

Automated Document Processing pipeline

Built an automated document processing pipeline using NLP and OCR technologies, optimizing model performance and driving business outcomes.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
