

Jane Doe

Machine Learning Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

Highly motivated Machine Learning Engineer with 3 years of experience in designing, developing, and deploying machine learning and generative AI solutions. Skilled in Python, deep learning, NLP, MLOps, and cloud platforms, with a strong software engineering background.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, utilizing expertise in Python and cloud infrastructure.
- Built RAG pipelines using vector databases and embedding models, demonstrating proficiency in generative AI and machine learning.
- Improved model inference performance by 30% through optimization techniques, showcasing ability to optimize and refine AI systems.
- Collaborated with product and engineering teams to integrate AI services into production systems, highlighting strong software engineering and teamwork skills.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, leveraging expertise in machine learning and data analysis.
- Implemented end-to-end ML pipelines using Python and cloud infrastructure, demonstrating ability to design and deploy scalable AI systems.
- Automated model monitoring and retraining workflows, showcasing proficiency in MLOps and model management.
- Reduced model deployment time by 40% through CI/CD improvements, highlighting ability to optimize and streamline AI development processes.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, demonstrating expertise in generative AI and natural language processing.

Customer Churn Prediction Platform

Designed a customer churn prediction platform, leveraging machine learning and data analysis to forecast customer behavior and provide actionable insights.

Automated Document Processing pipeline

Built an automated document processing pipeline using NLP and OCR technologies, showcasing ability to design and deploy efficient AI-powered workflows.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
