

Jane Doe

AI Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

AI Engineer with 3 years of experience designing, developing, and deploying machine learning and generative AI solutions. Experienced in Python, deep learning, NLP, MLOps, cloud platforms, and production-grade AI systems. Strong software engineering background with a Bachelor's degree in Software Engineering.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, utilizing prompt engineering and vector databases.
- Built RAG pipelines using embedding models and optimized model inference performance by 30%.
- Collaborated with product and engineering teams to integrate AI services into production systems, ensuring scalability and reliability.
- Improved model performance and automated workflows, resulting in enhanced productivity and decision-making capabilities.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, leveraging machine learning and data analysis techniques.
- Implemented end-to-end ML pipelines using Python, cloud infrastructure, and automated model monitoring and retraining workflows.
- Reduced model deployment time by 40% through CI/CD improvements, resulting in faster time-to-market and increased efficiency.
- Worked closely with stakeholders to deliver value-driven AI solutions, ensuring alignment with business objectives and requirements.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an AI-powered knowledge assistant using RAG, leveraging LLMs and vector databases to enhance productivity and decision-making capabilities.

Customer Churn Prediction Platform

Designed and implemented a predictive analytics platform using machine learning and data analysis techniques to forecast customer behavior and reduce churn rates.

Automated Document Processing pipeline

Built an automated document processing pipeline using NLP and OCR technologies, streamlining workflows and improving efficiency in document management.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
