

Jane Doe

Junior AI Engineer

jane.doe@email.com | +44 7700 900077 | London, UK | linkedin.com/in/janedoe | github.com/janedoe

PROFESSIONAL SUMMARY

AI Engineer with 3 years of experience designing, developing, and deploying machine learning and generative AI solutions. Experienced in Python, deep learning, NLP, MLOps, cloud platforms, and production-grade AI systems.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases

Cloud & MLOps: AWS, Docker, Kubernetes, CI/CD, MLflow

Data: Pandas, NumPy, Spark

PROFESSIONAL EXPERIENCE

AI Engineer – InnovateAI Solutions

Jul 2024 – Present

- Developed and deployed LLM-powered applications for enterprise clients, utilizing Python and cloud infrastructure.
- Built RAG pipelines using vector databases and embedding models, improving model inference performance by 30%.
- Collaborated with product and engineering teams to integrate AI services into production systems, ensuring reliable and efficient workflows.
- Improved model performance through optimization techniques, demonstrating expertise in AI and ML development.

Machine Learning Engineer – DataVision Technologies

Jul 2023 – Jun 2024

- Designed predictive analytics models for customer behavior forecasting, leveraging machine learning and data skills.
- Implemented end-to-end ML pipelines using Python and cloud infrastructure, automating model monitoring and retraining workflows.
- Reduced model deployment time by 40% through CI/CD improvements, showcasing ability to work with production code and collaborate with teams.
- Worked with real-world datasets, contributing to evaluation pipelines and measuring system performance, demonstrating data skills and attention to detail.

SELECTED PROJECTS

Enterprise Knowledge Assistant using Retrieval-Augmented Generation (RAG)

Developed an enterprise knowledge assistant using RAG, demonstrating expertise in generative AI and NLP.

Customer Churn Prediction Platform

Built a customer churn prediction platform, serving business analytics teams and showcasing ability to work with machine learning and data.

Automated Document Processing pipeline

Created an automated document processing pipeline using NLP and OCR technologies, highlighting ability to work with production-grade AI systems and collaborate with teams.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering – Tech Valley University

Graduated: 2023
